DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1-45 in the reply filed on 5/16/06 is acknowledged. The traversal is on the ground(s) that it would not create an undue hardship on the Examiner to search Groups I-III together. This is not found persuasive because Groups I-III require different fields of search a serious burden exists in the differing issues likely to arise during the prosecution of the differing inventions.

The requirement is still deemed proper and is therefore made FINAL.

2. Applicant did not make a complete election for all the species in Group I. Applicant elected the species "wherein the polymeric material is non-erodible", but did not elect a species of carrier fluid. The election of species requirement is provided again below.

3. Group I contains claims directed to the following patentably distinct species: wherein the carrier fluid is carbon dioxide and wherein the carrier fluid is water. The species are independent or distinct because they are mutually exclusive.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 5, 8, 10 – 17, 20, 22, 23, 25 – 31, and 35 – 45 are generic.

4. Group I contains claims directed to the following patentably distinct species: wherein the polymeric material is non-erodible and wherein the polymer is a single disclosed species listed on page 17 lines 6 – 33. The species are independent or distinct because they are mutually exclusive.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 – 10, 13, 15 – 17, 19 – 23, 25 – 40, 43, and 45 are generic.

Art Unit: 1762

If Applicant chooses to elect a single disclosed species listed on page 17 lines 6 – 33, the elected species of polymer material must be a specific material (i.e., not a copolymer).

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 1762

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jimmy Lin whose telephone number is 571-272-8902. The examiner can normally be reached on Monday thru Thursday 8 - 5:30 and Friday 8 - 4:30.
